

#### INTRODUCTION

Emiss Hughes International Succer offers realistic areade action and football management combined into one great game! While there are a wide range of facilities and control options, these have been designed in such a way that you can sit down and play without hours spent studying the manual, and getting to grips with the controls.

One or two can play, either against each other, or against the computer. You can even watch two computer teams playing each other! Player skill levels and fitness levels vary, so picking the right team is just as important as the way you control your players during the game. Fixture lists, results, and league tables may be displayed at any time during the season.

Audiogenic's innovative football management game Super League Manager can link to Emlyn Hughes International Socces! Ask your dealer or write to Audiogenic for details.

## LOADING & CONTROLS

#### Atari ST and Amiga

Place the disk in the drive and reset the computer - the program will autoboot. The same is played using one or two joysticks to control the action, but in the strategy section of the game you may use a m

load from disk type I.OAD";\*",8 and press RETURN, then type RUN. To load from tape hold down SHIFT and press RUN/STOP. The game is played using one or two joysticks

#### Amstrud CPC

Type RUN"EMLYN" and press ENTER. The game is played using one or two joysticks.

#### Secretrun

Type LOAD\*\* and press ENTER (disk users should use the loader). After loading choose the controls you wish to use - these instructions assume you are using a joystick. Up to 3 different control methods can be chosen. Before each game the controls are displayed - press SPACE to cycle through the options.

#### GETTING STARTED

when the game starts you will see a blank screen with a blue menu bar at the top, and an arrow which acts as a pointer. If you move the joystick the arrow moves. Move the arrow until the Game option is highlighted, then press the fire button. A menu will drop down; to start a game move the arrow until the Play Game option is highlighted, then press the fire button again - a friendly match between two computer-controlled teams will follow.

If you want to take part in a match yourself you must first become manager of one of the teams - see Edit Teams in the Strategy & Options section. If you want to play against a friend each of you must become manager of a team - then set up a friendly between the two teams.

If you've played a computer football game before you'll already know the basic controls. But for anyone who's playing football on a computer for the first time, here's what you do:

- You control one player at a time. The player you are controlling at any particular time is indicated by an arrow above his head (and his name is displayed on the scoreboard or at the top of the screen). If your side has the ball, the player with the ball will be highlighted, unless it is a throw-on, a goal-kick, a corner, or a free kick, in which case you will control one of the players waiting to receive the throw or kick.
- . When one team is computer-controlled, and the other is controlled by a human player, the computer team always kicks from right to left.
- Move the joystick in the direction you want your player to run and hold it in that direction until he reaches the required speed. If you now allow the joystick to return to the central position he will continue moving in the same direction and at the same speed. To slow down move the joystick away from the direction of movement,
- To kick the ball press and release the fire button the length of time you hold the fire button
  down determines the strength of the kick. All actions which are controlled by the fire button
  are triggered only when you release the button.

That's all you really need to know to be able to play, but there are many more controls to learn about as you become more confident and proficient. Don't try to run before you can walk, though!

## PLAYER CONTROL - ADVANCED TECHNIQUES

TURNING
To change direction move the joystick so that it points in the new direction. Of course, as in real life you can't suddenly turn round without losing some momentum. If, for example, you move the joystick so that it is pointing in the opposite direction your player will slow down, turn around, then start runing again. You'll find that if you move the joystick through 180 degrees yourself, going through all the angles in between (i.e. don't pass through the centre), you can change direction much more quickly. The same principle applies to other changes in direction. This can gives an experienced player a useful edge over a less practised opponent.

## SIDESTEPPING & BARGING

When you're trying to dribble past the opposing defenders you'll often want to sidestep to avoid a tackle. Sidestepping involves taking a step to the left or right without actually changing direction, and can be very confusing for the opposition.

To sidestep move the joystick from the central position at 90 degrees to your direction of movement, and release it instantly (if you hold it too long or pass through the 45 degree angle you'll actually change direction). To barge a player running alongside you use exactly the same control method. These moves are very useful, so keep practising them until you are perfect!

# KICKING THE BALL - ADVANCED TECHNIQUES

If you could kick the ball only in the direction you were running it would be very difficult to pass and shoot accurately. Emlyn Hughes International Soccer allows you to control the height and direction of the ball when you kick it - if you wish.

You can kick the ball at three different heights, determined by where the joystick is positioned when the fire button is released. If the joystick is pointing in the direction that the player is running the ball will stay low. If the joystick is pointing in the opposite direction the kick will be lofted (ideal for lobs and centres), whilst if the joystick is in the central position a 'normal' kick will result, halfway between the other two.

## CONTROLLING THE DIRECTION

You can kick the ball in up to five different directions, depending on the options selected before you start plaving. If you choose the 1-direction option the ball is always kicked straight ahead (you can, of course, change direction just before kicking if you want to fool your upponent). The 3-direction option allows you to kick straight ahead, or at 45 degree angles either side, move the joystick at right angles to the direction you are running after you press the fire button (but before you release it, of course!).

The 5-direction option is the most difficult to use, but by far the most powerful, not least because it allows you to kick the ball at angles not otherwise available. You should aim, therefore, to master this method of kicking as soon as possible.

To access the additional directions move the justick at right angles to the direction of movement. If you let To access the additional directions move the justick at right angles to the direction of movement. If you let go of the justick before the fire button is released, the ball is kicked at an angle of about 20 degrees to the direction of travel (ideal for shots); if the fire button is released before you let go of the joystick the angle increases to about 20 degrees (just right for centres, or when you want to pass the ball out to the wing). While the 5-direction option does not give you access to the 45 degree angles you can always change direction just before shooting or passing.

Of course, you can combine the controls that set the height of the kick with those that fix the direction - so, for example, if you must the justick away from the direction of movement and also to the side you will get a lofted angled kick. Allowing for the possible variations in strength of kick there are literally hundreds of possible different kicks!

### BACKHEELS

To backheel the ball press the fire button and move the joystick backwards (i.e. away from the direction you are running), then forwards, while the fire button is held down. Backheeling the ball is sure to confuse the opposition!

## CHOOSING WHICH PLAYER YOU CONTROL

When the player you are controlling is not in a good position to get the ball you will usually want to select a different player. There is an automatic reselection option, where the computer will decide which player is in the best position. Journanual reselection allows experienced players to use their skill to advantage.

To select a player poins the fire button, move the joistick in the approximate direction of the player you wish to select, then release the Irro button. If there are two players in similar directions the computer may highlight the wrong one a repeat the process until the right one is highlighted.

It is not possible to choose another player when the player you are controlling has the ball (since pressing the It is not posture to choose anomer prayer when the pracet still are combining may be accounted from the form that on would make him kick till, or when he is very close to the ball (in which case pressing the fire button might initiate a shifting tackle or daying header). However, with practice, you will find it easy to change control when you past the ball from the player who made the past to the player who will receive the past - point the justick in the direction of the past and press fire.

Whichever reselection option you have chosen a player on your side who comes into possession of the ball will automatically be highlighted findess he is taking a throw in, corner or free kiekl

#### HEADING THE RALL

To head the bull pers and release the frie button. Provided the ball is within range your player will jump up to head the ball. It the ball is too low for a normal header he will automatically attempt a diving header (diving in the direction he is running).

A diving header results in the ball bouncing off in the direction of the dive; the direction of a normal header depends on the juystick position at the time the ball makes contact with your player's head - you can select any of 8 angles, so you can flick the ball or head it backwards if you are skilful enough.

### SLIDING TACKLES

netimes the ball is just too far away for you to trap it normally, or for a normal tackle to be effective. In this situation the solution is to slide towards the ball to gain the added yard of pace that you need

Press and release the fire button to initiate a sliding tackle (the ball must be too low for you to head it, otherwise a diving header will result). If you come into contact with the ball you may succeed in controlling it, or it may break losse. You may even give away a free kick, especially if you tackle from behind, so take particular care when tackling in the penalty area!

# FREE-KICKS, CORNERS & THROW-INS

These are handled automatically. The ball is kicked or thrown to the highlighted player either after a few seconds (the time varies) or when the fire button is pressed and released with the joystick central (if the joystick lin!) in the middle it will be assumed you are trying to change players). If the goal is in view the player taking a free kick will sometimes take a shot.

PENALTIES.
These can be handled automatically, but if you want to increase your chances of scoring you can take control.

Just hold down the tire button to determine the strength of kickl and move the joystick in the appropriate directions during the conjugacy is if you were kicking the ball normally. Of course, if you kick the ball straight ahead the goalkeeper is likely to save it, unless you lob it over his head.

## CONTROLLING THE GOALKEEPER

CONTROLLING THE GOVERNEED on the goalkerper vourself, or allowing the computer to control him. You only control the goal-coper when the goal is under threat, to make him dive or gather the ball you must press and release the fire button with the jovstick central. Any other joystick movements are interpreted as instructions for your highlighted player

When two players are playing against the computer the goalkeeper can be controlled by either player. Automatic control of the goalkeeper is recommended for beginners. It is the timing of the fire button release that determines whether or not the goalie has the best chance of saving the shot.

## PAUSING THE GAME

PAUSING THE GAME.

Pressing the SHIFT key (CAPS SHIFT on the Spectrum, CBM key on the C64) halts the action at any time during the game. You must pause the game if you want to take photographs of the screen (hint: use an exposure of at least one-quarter of a second, otherwise you will get dark bands across the screen - ideally you will need a tripod to ensure that the camera does not movel.

Press the key again to restart a paused game

## SUBSTITUTIONS CHECKING FUNESS LEVELS

Substitutions (THERNS, FILENE).

During a match the literies of the players steadily decreases, and may go down suddenly if a player is injured by a bad tackle or awkward fall. If you press Q (B on Spectrum or Amstrad) whilst the game is paused and the ball out of play (for a throw-on, corner, goal-kick or penalty) the menu screen will appear. Many menu selections are unavailable during a game or else only take effect when the next game is played.

Select the PIck Team option from the Game menu. This books exactly the same as the Edit Team screen, but you cannot change anything except the positions. If you decide you do not want to make any changes, exit from the menu and select Play Game to continue the match. If you decide to make a substitution (and proxided you have not already weed your substitute to the multiper of the player you want to take off and press fire. Now move the number of the player you want to take

Exit from this screen by moving to the menu bar and pressing the fire button

Press SPACE (f on the 6.64) to skip the sequences where players are running on or off the pitch, or back to their positions after a goal is scored. Press ESCAPE (L on Spectrum or Amstrad, RUN/STOP on C64) to about the game.

## STRATEGY 4 OPTIONS SECTION

Emirn Hughes International Soccer offers a wealth of different game options. All of these options are selected using a simple drop-down menu system

Almost all menu functions are performed using the justick or mouse, but occasionally you will need to use the keyboard to enter a name. To display the menu bar (which shows the names of the four menus) move the arrow to the title at the top of the screen and press fire. Move the pointer to the menu you require and press fire again to display the menu in full

Move the pointer up and down the menu, then press the fire button when it points to the menu option you require, or the item you wish to alter

Some items in the menu are followed by a tick or a cross. These are options you can turn on irr off by pressing fire or the mouse button. Others display values (or sometimes colonis) that you can change by moving the jostick left and right whilst the fire button is held down (or else using the left and right mouse buttons). Move the pointer to the option you require and press fire to select it.

Sometimes menu options will be shaded or in a different colour. These are options that are not available at a particular time. For example, if there is no game scheduled to be played the Plux Game option cannot be selected. Many options are unavailable during a competition, to prevent cheating!

## CHOOSING YOUR SQUAD

Thousands Towns agreem is probably the most important in the strategy section of the game. It allows you to decide who you want in your 16-man squad for the current season (once the season begins you cannot change any of the squads).

To change the player names move the pointer to the first name you want to change and press fire. A cursor will appear. Simply type over the old name and press ENTER when you have finished entering the new name (press CLR/IIOME on C64, ST, or Amiga to clear the old entry).

The 'Played by,' entry denotes whether the team is computer-controlled or controlled by a human player. Any entry other than COMPUTER gives human control. Normally you should enter the name of the person who controls the particular team

#### PICKING TEAMS

You can pick your team using either the Edil Team or Plck Team options (although during a competition only Plck Team is available). Suppose that you want to drop a player, say number 7, and replace him with a player not currently in the team. Move the pointer to where the number 7 is displayed and press the fire button lo pick up the number. Now move the number up or down the column to where the replacement player is, and press the fire button to drop the number 7 against his name

If you allocate a new shirt number to a player who already has a number you automatically pick up his old number, which of course you must allocate to another player. Numbers 12 and 14 indicate the two substitutes.

#### PLAYER SKILL FACTORS

PLAYER SKILL FACTORS
Each player (except for the goalkeeper) has three skill factors, Running Speed, Defensive Skills, and Attacking
Skills. Each skill can be at three different levels, indicated by the number of blue buttons that are lit up the more buttons that are lit the better the skill level. To change the skill levels move the pointer to the
appropriate button and press fire - the number of buttons lit will cycle from 1 to 2 to 3 and back to 1 again.

## FITNESS LEVELS

At the start of a season all players are fully fit, but during each game the fitness of those players who are playing declines steadily due to fatigue - and may fall drastically after a bad tackle. Players whose fitness declines below 75% will start to play well below their normal standard of skill, and you may need to substitute them. Sometimes you may decide to take a chance and play one of your star players even though he is unfit-it may pay off, but it could also be a disaster.

Fitness levels will normally increase in the week between matches, but you may find that players need to be rested for a week or two to regain full fitness. Fitness tevels are not taken into account in friendly matches, or when Equal Skills is selected, nor do they change during the game - in other words players play as if they were fully fit during a friendly, but at the end of the game their skill level will be unchanged.

## EXITING AFTER EDITING TEAMS

EXITING AFTER EDITING TEAMS
When you have finished editing the team move the pointer to the menu har, then press the fire button (on the Ché double-click) on a blank area of the screen by pressing the fire button twice in quick succession). This will display a box with three buttons. Move the pointer to the ? button and press tire if you exited by mistake; move to the X button and press fire to exit from editing without any changes being made (i.e. if you have made a mess of things!) Press fire when the pointer is on the button marked with a tick if you are happy with the changes you have made.

## COMPETITIONS

There are three options, a League in which all 8 teams play each other once or twice (depending whether the Home & Away option is selected), a Cup which is a knuckout competition between 8 teams, and a Seaton which gives two separate competitions, a league and a cup.

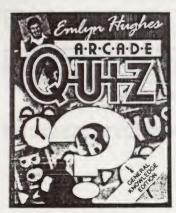

When you start a competition any competition already in progress is abandoned, so if you wish to play both a Cup and a League you must use the Start Season option. If you want to start a new competition and continue the existing one at a later date use the Sase All function to save the state of the competition.

SAVING THE GAME.

Since there could be as many as 60 matches in a season, it is essential to be able to stop at any stage and restart another day. The Save All option under the Game Menu saves not only all the lixtures and results of date, but all the team details including names, skill levels, and litness levels, together with the current settings of the various options. Save Team records the data for a particular team only, not option settings, results or fixtures.

DO NOT ATTEMPT TO SAVE ANYTHING TO THE PROGRAM DISK OR TAPE. YOU MUST USE ONE OF YOUR OWN DISK OR TAPES. REMEMBER ALSO THAT YOU MUST LOAD THE PROGRAM BEFORE ATTEMPTING TO RELOAD AN UNFINISHED GAME.

If you are using an Amiga or ST the files must be saved to a specially formatted disk. First format a blank disk in the usual way, then use the Make Data Disk menu option to turn it into a data disk.

### OPHONS MEN

Duration 1 or 2 · Computer Extra Ilme Each match can list up to 90 minutes tptus extra time)

Home & Anas

Practice

Lach match can list up to 90 minutes (plus extra time). The or two human plasers can play against the computer. Lister time can be played if a Cup game ordrawn. Otherwise a replay is necessary. Substitutes

#### COLOURS MENU

On the SI and Numa you can design the strip that each team wears. Shirts can be plain or striped, sleeves can be long or short tand can be a different colour from the rest of the shirt! You can even have a coloured stripe on the players shorts and sock! Two unique strip colours can be chosen for each team (in addition to black and white which are available for all teams). The flesh tone of the players can be varied

To assign a colour click on the culture, then on the box alongside the part of the strip you wish to change. To change one of the selectable colours double click in the colour, then adjust the R. G. and B sliders. Change the flesh tone by clicking on the colour you require. On the Amiga vou can chiuste a national flag or rosette for each team - click on the arrows to make your selection, then, if you have chosen a rosette, set the colours in the same way

On the Amstrad the following colours can be changed.

Pitch Colour Initially green; also used as a shirt colour Initially white, also used as a shirt colour Initially white, also used for stripes on shirts Usually black; also used for players hair, boots etc. The goalie shirt colours can be awapped with one of the teams Line Colour Flesh Colour

Goalle Colour

On the C64 you can also change the ball colour; the player shift colours are set using the Team Colours option in the Game menu. On the Spectrum there are only two colours, but either can be changed!

#### GAME MENU

The following selections are available

Play match Arrange Friendly

This starts the game shown at the bottom of the screen. You can arrange a friendly match between two teams at any time. Move the pointer to the Home team and press the fire button, then choose the Away team similarly. If the humanics supposed to be playing in the next match is not available the match can be played at the end of the current week's fixtures.

you require. Shows the league table. Show Table By Icam

Results textures depliced by terms or by week Which week is displayed By Week

## Hints

Here are some tips to help you get the most out of the game:

- be realistic when you fix the player. kill levels, to example forwards will usually be faster runners than backs, but of course they wou't be so good at defending.
- learn to master the simple skills before you attempt some of the more suphisticated moves
- remember that because of the angle from which you are looking down on the pitch it doesn't seem as

## Problems?

Nothing Fagg we when I select Plus Game

nter teams you won't see anything unless there is a tick against View Computer vs Computer in the Options Menu

Probably both teams are computer-controlled - you must become manager of one of the teams (select Edit Team and change the Played by: entry from COMPETER to your own name). You might alternatively be using the wrong controls

Nothing happens when I press the the button

That's right, strictly spreaking. All actions are triggered by the release of the fire button, because the length of time the fire button is held down needs to be measured.

I am having trouble controlling throw sus and free kicks.

To force a throw an expensive table taken you must press the fire button and release it with no direction selected. If the payrical is not central the computer will assume you are trying to change to another player.
